The Department of Information and Communication Technology, Manipal Institute of Technology is organizing an International Conference on Recent Advances in Information technology for Sustainable development (ICRAIS-2023) on 6th and 7th November 2023. It is designed in the field of Engineering and Applied Science with the scope of multidisciplinary research. It is aimed to provide self-reliant technological solutions for the socially relevant and economically impactful strategies for the well-being of humanity, and sustainable development.

The conference provides a unique platform for researchers, technology solution seekers, experts and entrepreneurs, to present, interact, and network with peers. It acts as a forum to discuss and nurture ideas for developing products and innovative solutions for the betterment of mankind. A series of keynote presentations, and technical paper presentations are planned for this conference. This conference aims to bridge the gap between theory and practice in the domain of information technology as well as sustainable development to address the problems of social importance. All accepted and presented papers will be submitted for possible publication in IEEE Xplore® Digital Library through the IEEE Conference Publications Program (CPP).
