

About Conference

Control Instrumentation Systems Conference (CISCON) is a flagship event organized since 2004 by the Department of Instrumentation and Control Engineering which is now merged under School of Electrical Engineering at Manipal Institute of Technology, Manipal. This conference over the years has become a most sought-after conference and has given a platform for both national and international participants to present their research papers and deliberate. Also witnessed many experts from reputed industry/institutes from India/abroad present keynote/invited lectures. CISCON-2026, XXIII edition is organized by the School of Electrical Engineering during August 7th and 8th, 2026 at MIT, Manipal. Through this conference, we anticipate researchers, industry experts and academic experts to deliberate challenges and ideas related to current trends in control, instrumentation, automation, smart systems, sustainable development and emerging technologies. The conference provides attendees and stakeholders with a chance to network while exposing to recent technical advancements.

In an era marked by rapid technological advancements and complex systems, the theme for CISCON-2026 is set to inspire, challenge and illuminate the path forward. We are proud to announce our conference theme: “Smart and Intelligent Systems for Sustainable Systems and Control Engineering”. As we sail through the sea of technological change, this theme invites participants to explore and chart the course for the future of control, instrumentation and systems engineering. The theme underscores the importance of innovation, adaptability and sustainability in a world where automation, data-driven decision-making and interconnected smart systems have become the norm.
