

International Conference on Microbial Networks and Planetary Health: A Systems Approach to One Health

January 28 – 30, 2026

Manipal School of Life Sciences,
MAHE, Manipal, India

The One Health concept resonates with the Indian philosophy of 'Vasudhaiva Kutumbakam', which emphasizes that the whole world is one family and the collective well-being of each and every individual in this planet is of great importance. This international conference aims to bring together scientists, healthcare professionals, environmental experts, and policy-makers to explore the interconnected roles of microbes in human, animal, and environmental health through a One Health paradigm.
